

HPE and Arcserve

HPE 3PAR Storage, StoreEver Tape, & Arcserve Unified Data Protection

Working together. Accelerating results.

A new style of partnering

Hewlett Packard Enterprise and Arcserve® are collaborating in a fresh new way to bring increased value to customers like you.

We know that acquiring technology is only the first step in achieving a business goal. The technology pieces need to work together. They need to be tested together. They need to provide rich functionality, quickly and effectively, so you can concentrate on your business needs.

To help satisfy these business needs, Arcserve is a member of the HPE Partner Ready Technology Partner program—an industry-leading program framework to provide sophisticated, validated IT solutions in a simple and efficient manner.

Arcserve has access to the right tools, processes, and resources to help our joint customers accelerate innovation and transformation that brings value and helps achieve desired business outcomes.

Product overviews

Arcserve Unified Data Protection (UDP):

Arcserve UDP is the only data protection solution to uniquely combine enterprise-ready capabilities with the simplicity required by small and over-stretched IT teams, proving power and resilience can coexist with simplicity and elegance. As the first solution to truly unify data protection across multi-platform cloud, virtual and physical environments, it enables organizations to cost-effectively apply the right level of protection varied systems, and manage all aspects of data protection from one elegantly-simple user console.

HPE 3PAR Storage and Arcserve UDP:

HPE 3PAR StoreServ is the industry's #1¹ midrange storage array and a leading all-flash array. Arcserve UDP, combined with HPE 3PAR Storage snapshot technology, enable frequent high-performance, agentless backups of VMware® and Hyper-V virtual machines (VMs) with minimal impact on the host servers. Hardware snapshots create point-in-time copies of file systems while offloading the task from the host servers. Software-based snapshots for host servers

can produce a significant burden on VM performance. Working together, Arcserve UDP and HPE 3PAR Storage technology create hardware snapshot copies in under one second for any size volume—without sacrificing VM performance.

HPE StoreEver Tape Family and Arcserve

UDP: HPE offers complete tape archive solutions to leading organizations around the globe, and is the worldwide leader² in tape drives, tape media, and tape automation. Arcserve UDP provides extensive capabilities to support StoreEver tape systems from autoloaders to very large libraries, allowing customers quickly and reliably to manage and store tape backups on-site or off-site—for archival or recovery. For more details on supported models, please visit [Arcserve](#).

Company overview

About Arcserve

Arcserve is a leading provider of data protection and recovery software that provides organizations with the assurance that they can recover their data and applications when needed. Launched in 1990,

Arcserve provides a comprehensive solution for cloud, virtual and physical environments, on premise or in the cloud, backed by unsurpassed support and expertise. Arcserve Unified Data Protection (UDP), available on Arcserve's appliance or your hardware, drives a full range of highly efficient and integrated data protection capabilities through a simple, web-based user console. Arcserve has a customer base of 45,000 end users in more than 150 countries and partners with over 7,500 distributors, resellers, and service providers around the world. Arcserve is headquartered in Minneapolis, Minnesota with offices around the world.

About Hewlett Packard Enterprise

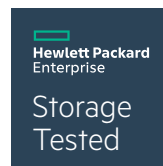

Hewlett Packard Enterprise is an industry-leading technology company that enables customers to go further, faster. With the industry's most comprehensive portfolio, spanning the cloud to the data center to workplace applications, our technology and services help customers around the world make IT more efficient, more productive, and more secure.
